

# OPTIMIZE YOUR STATE FILINGS PROCESS

*Speed up the approval of insurance product filings and recognize significant cost savings*

Perr&Knight's state filings unit is the largest provider of rate, rule and form filings services in the country. We prepare and submit thousands of filings annually, more than most insurance companies. Using this extensive experience, Perr&Knight has developed an innovative new software offering, StateFilings.com, that will revolutionize how insurance companies manage their state filings process.

## **With StateFilings.com's elegant and easy to use interface insurance companies can:**

- » Manage all filing projects, filing documents and policy forms on a centralized cloud-based platform
- » Create and manage a historical library of policy forms and endorsements across all products in all states
- » Gain valuable insights into internal projects and processes by utilizing robust and flexible dashboards and reports

## **StateFilings.com provides a best practices solution to minimizing regulatory risk with respect to filings by:**

- » Automating project management activities
- » Simplifying and centralizing workflow and communications
- » Accessing information quickly by using powerful search tools

## **This flexible and customizable system offers the ability to:**

- » Create searchable and sortable custom fields
- » Generate customized views of the data
- » Assign or remove permissions that give users access to various information
- » Easily migrate older filings from SERFF into the StateFilings.com platform

## **Additional features include:**

- » SERFF integration
- » Bureau monitoring services that monitor, manage and assess the impact of circulars and bulletins that affect bureau-based insurance products
- » Data stored in a safe and secure SAS70 certified data center
- » Real time access to the status of filings for all interested users
